

Data Validation Automation

Reducing cost by building a data validation solution using intermediate key tables in Power Bi with live connection
- Faizal Ahmed

Challenges faced by data migration team

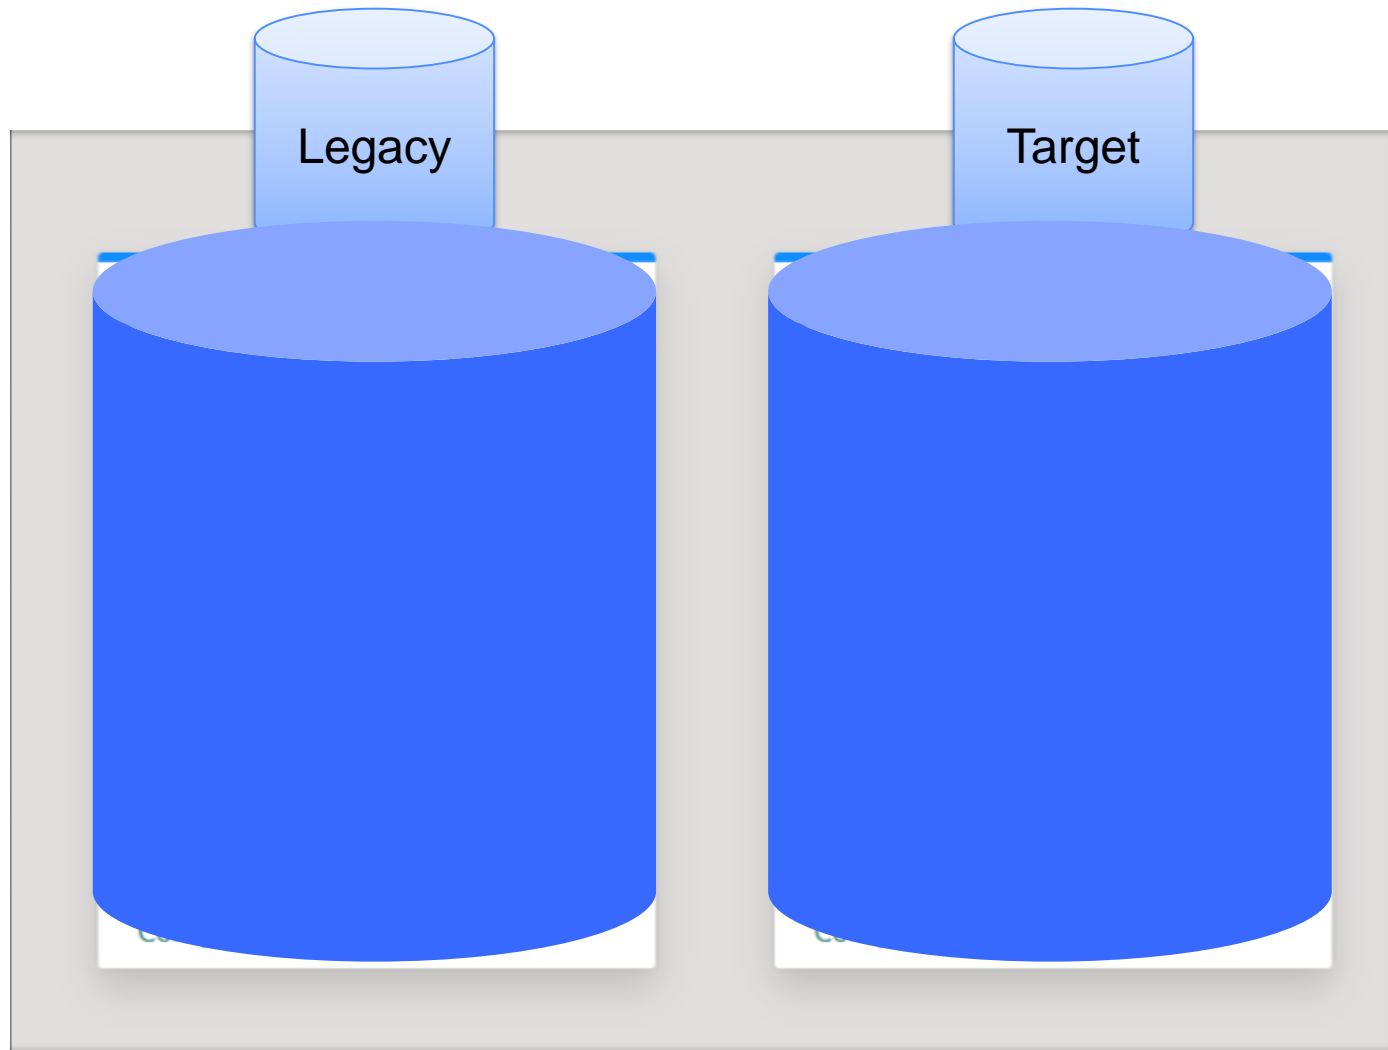

Challenges in Data Comparison During Migration

Current Process

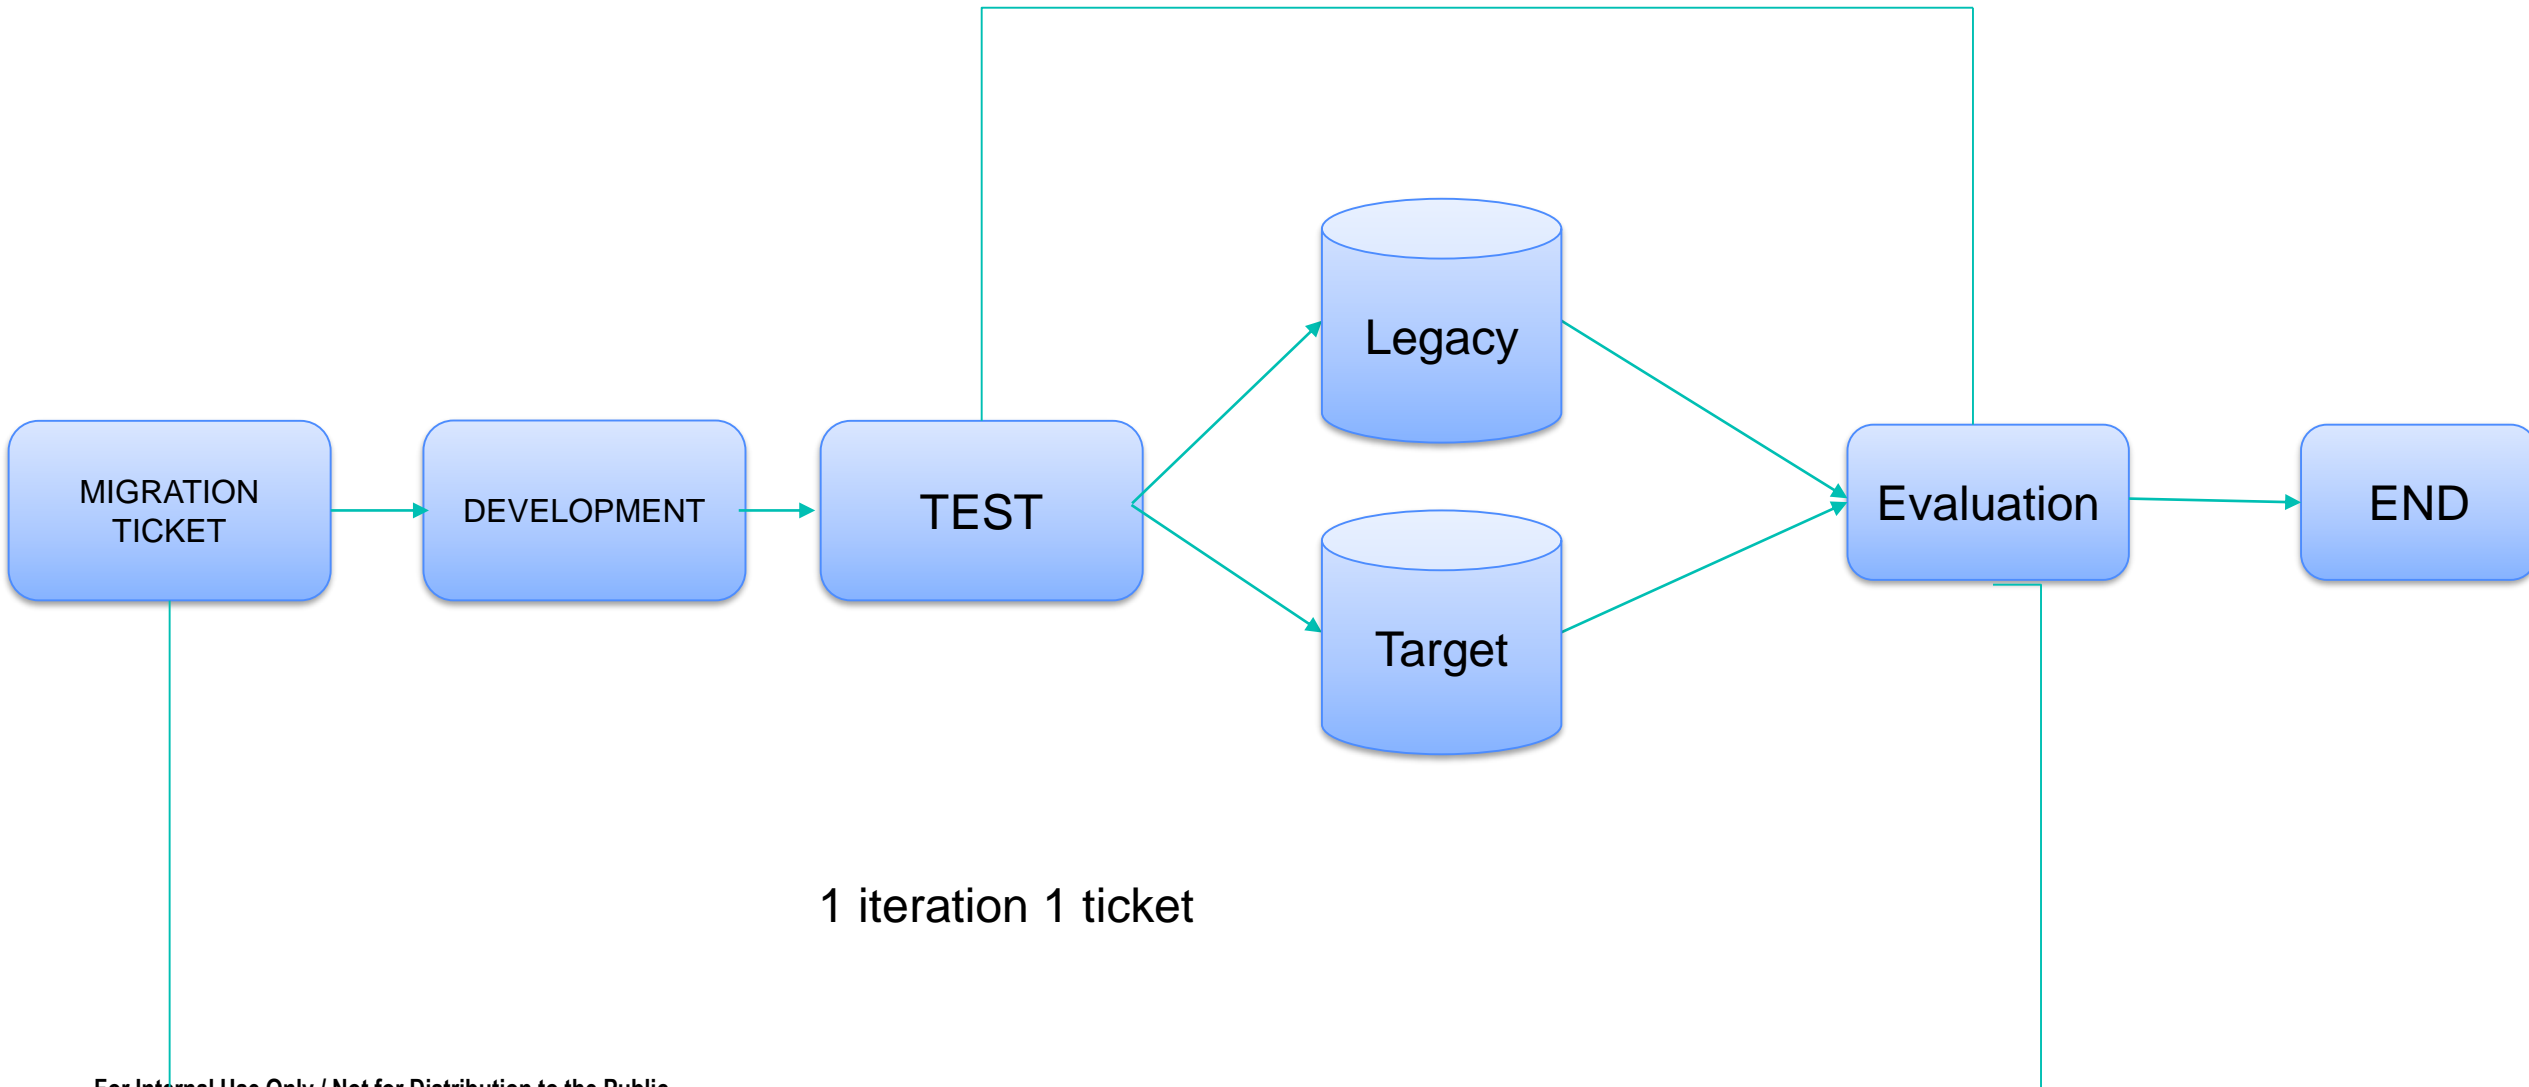

Current Data Modelling

Current cycle

Time taken : 16 hours approximate

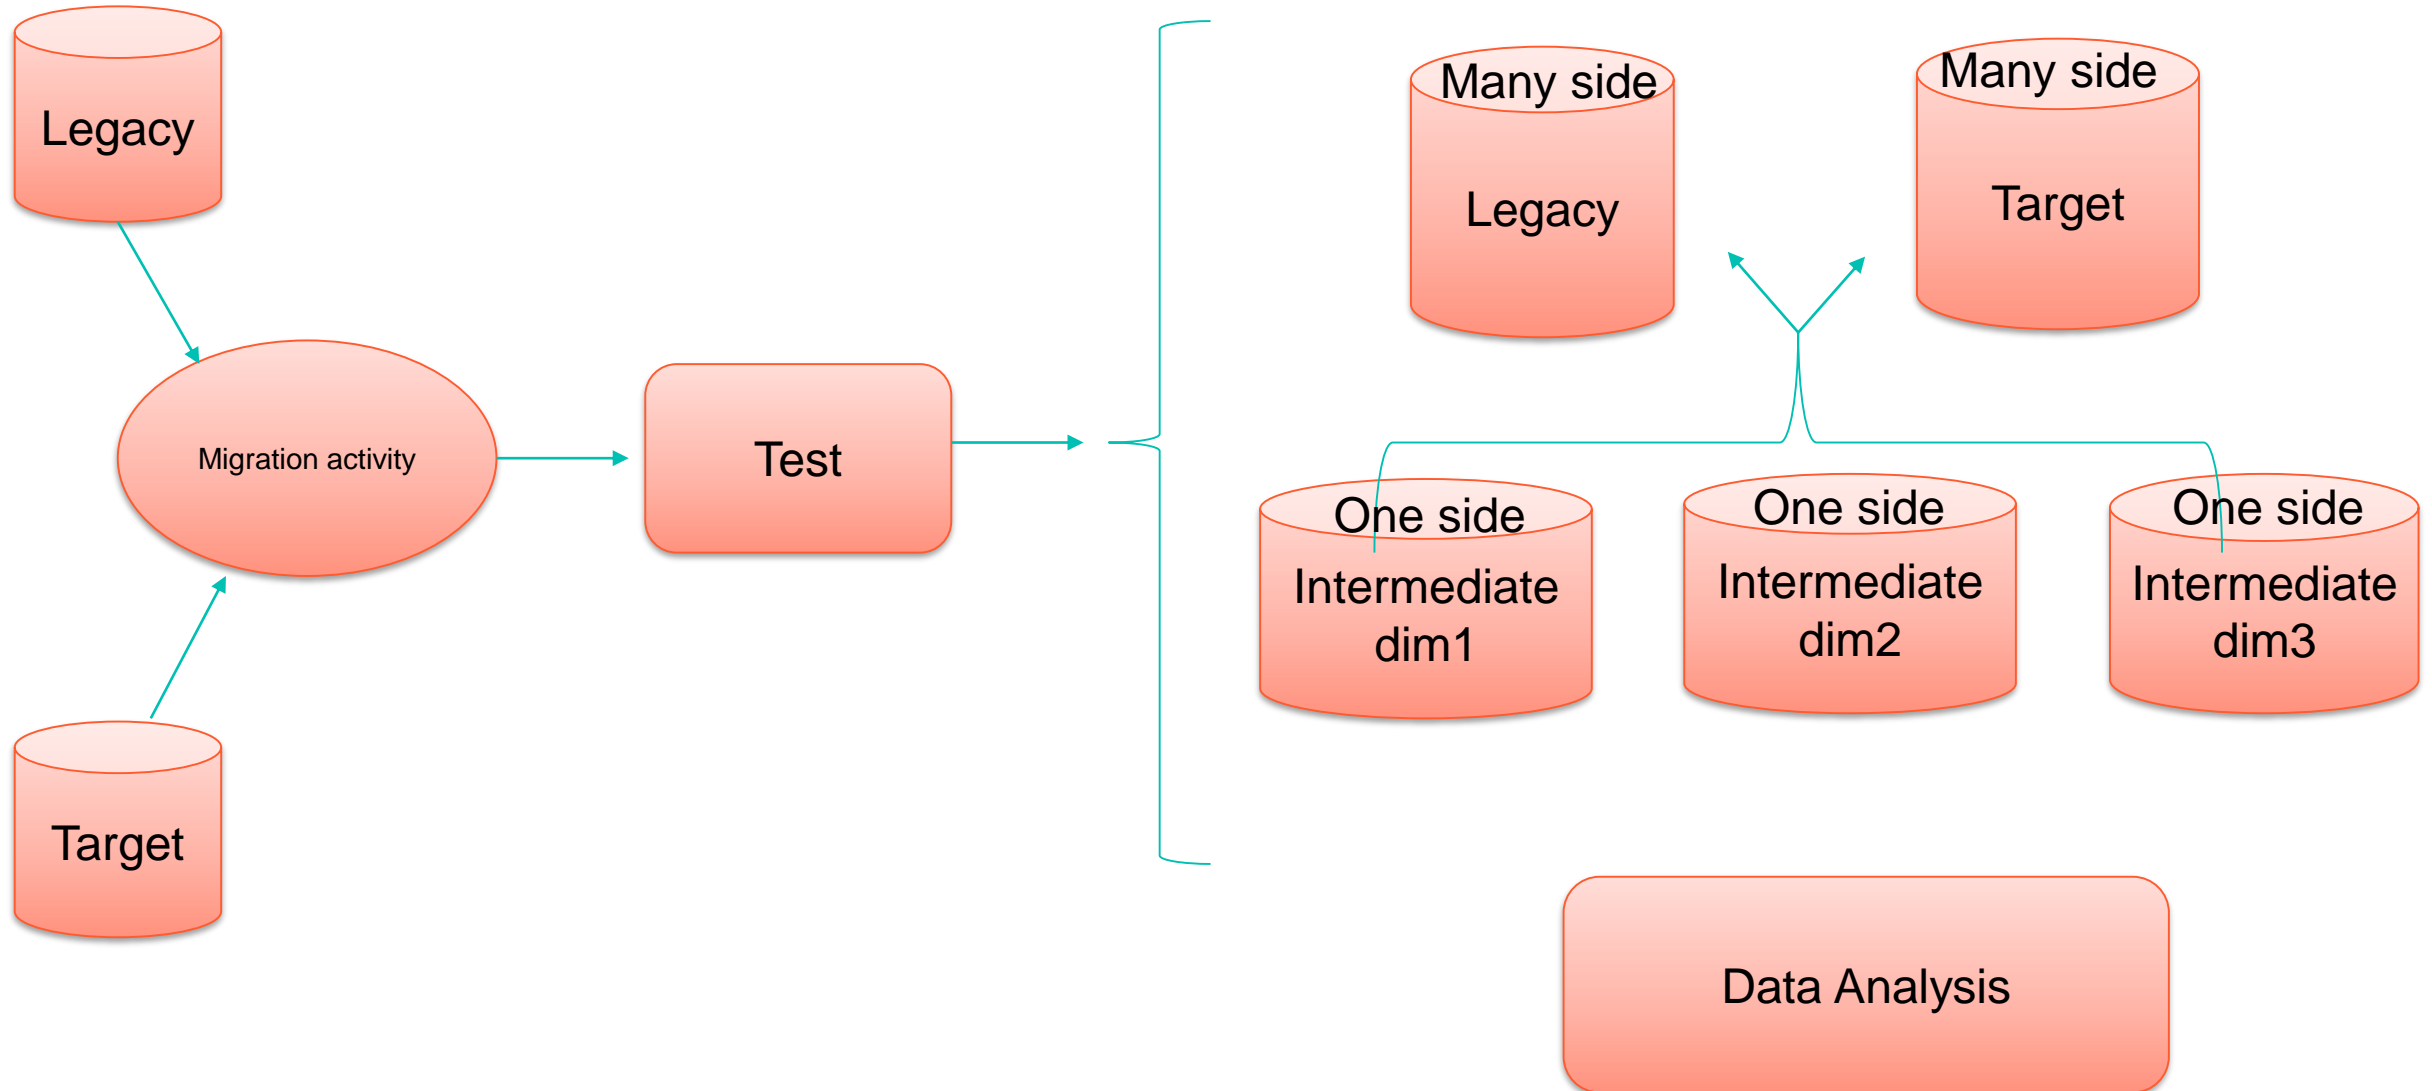

Idea

Legacy

Target

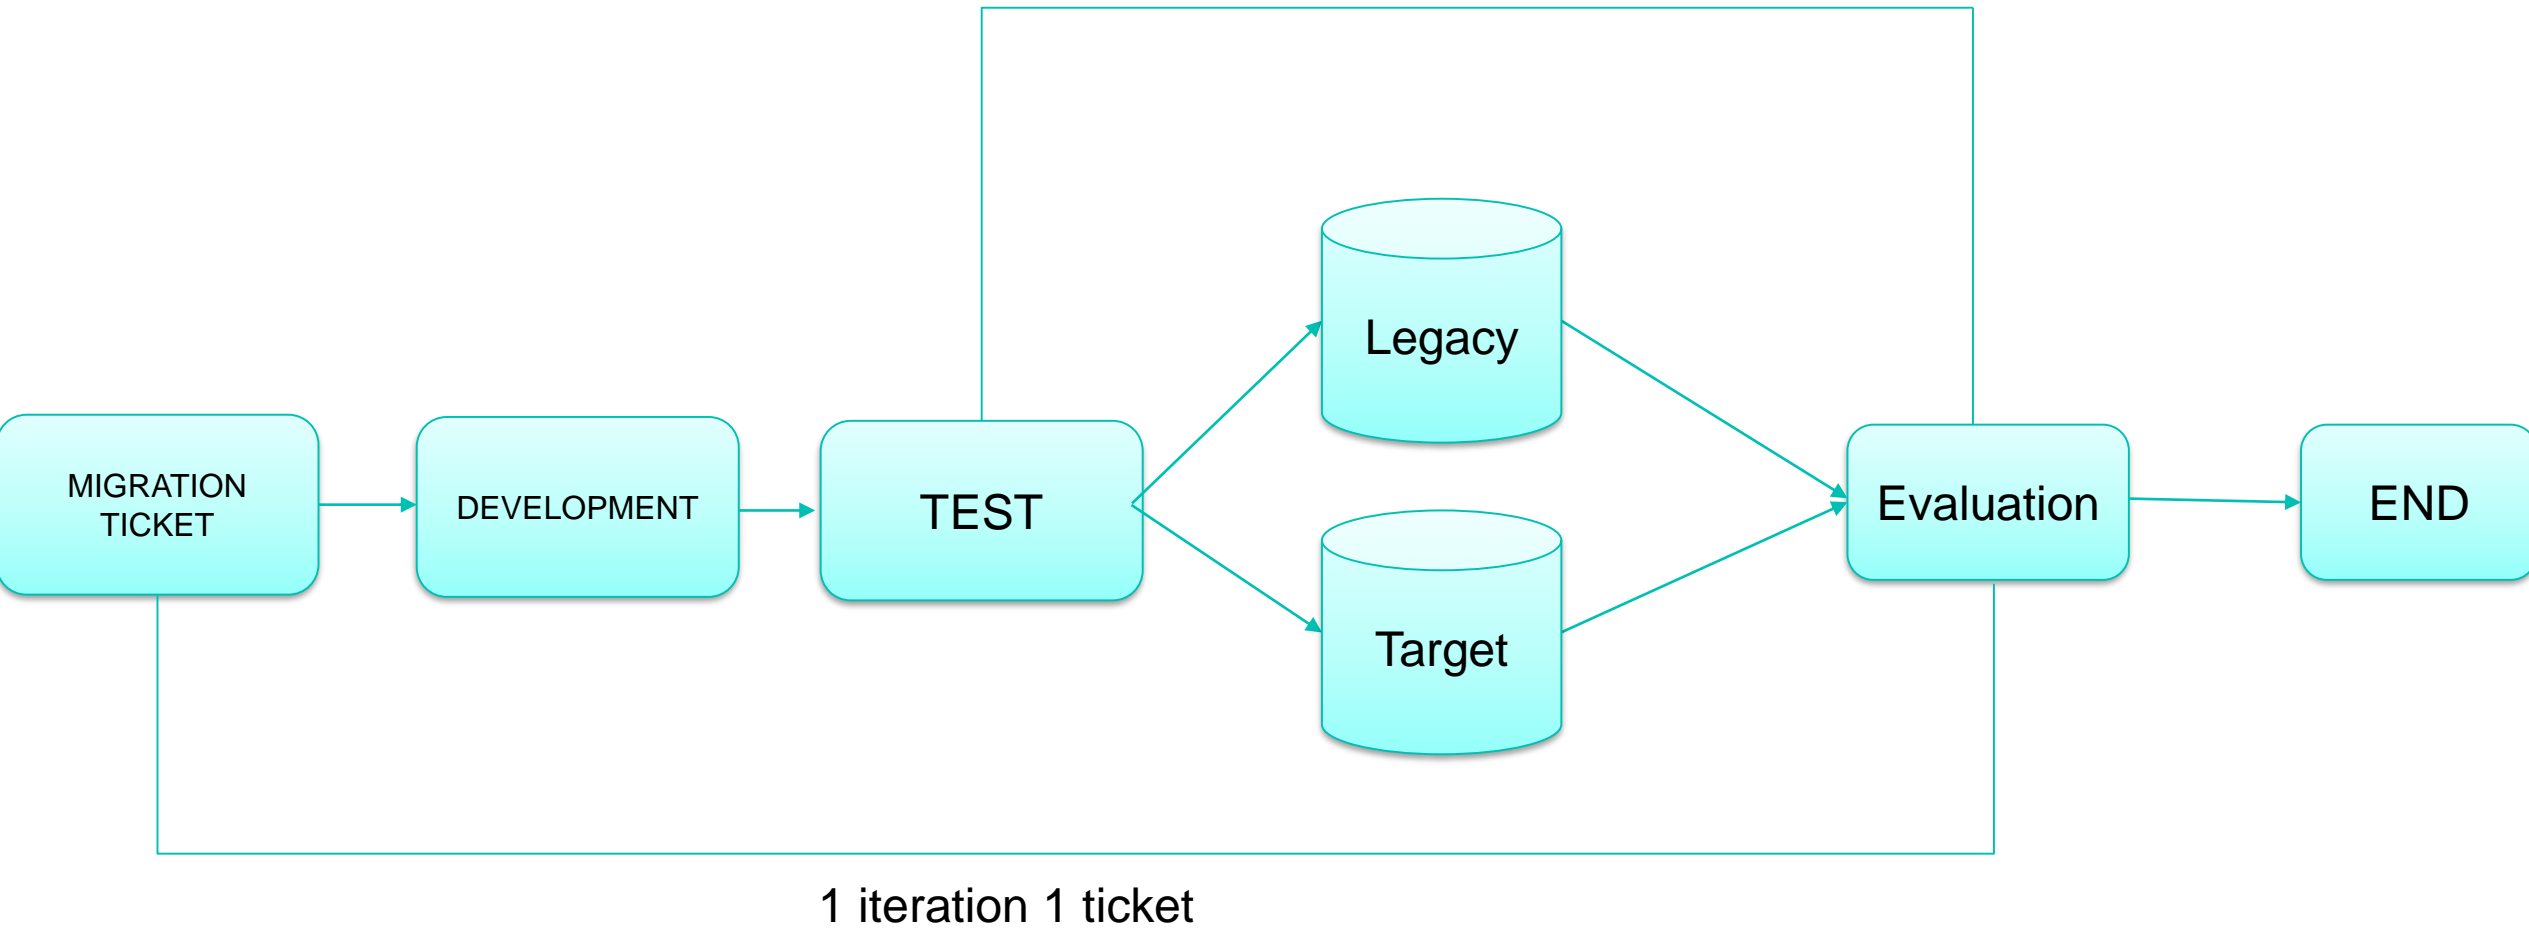

Idea graphical representation

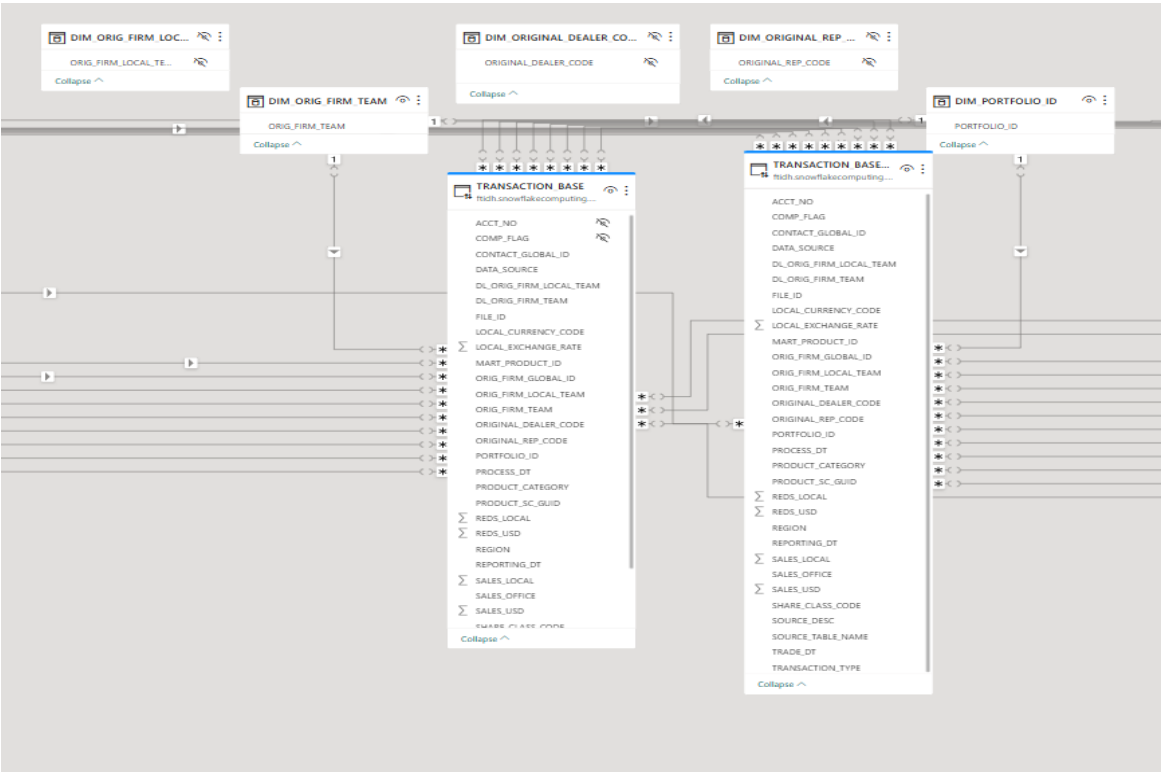

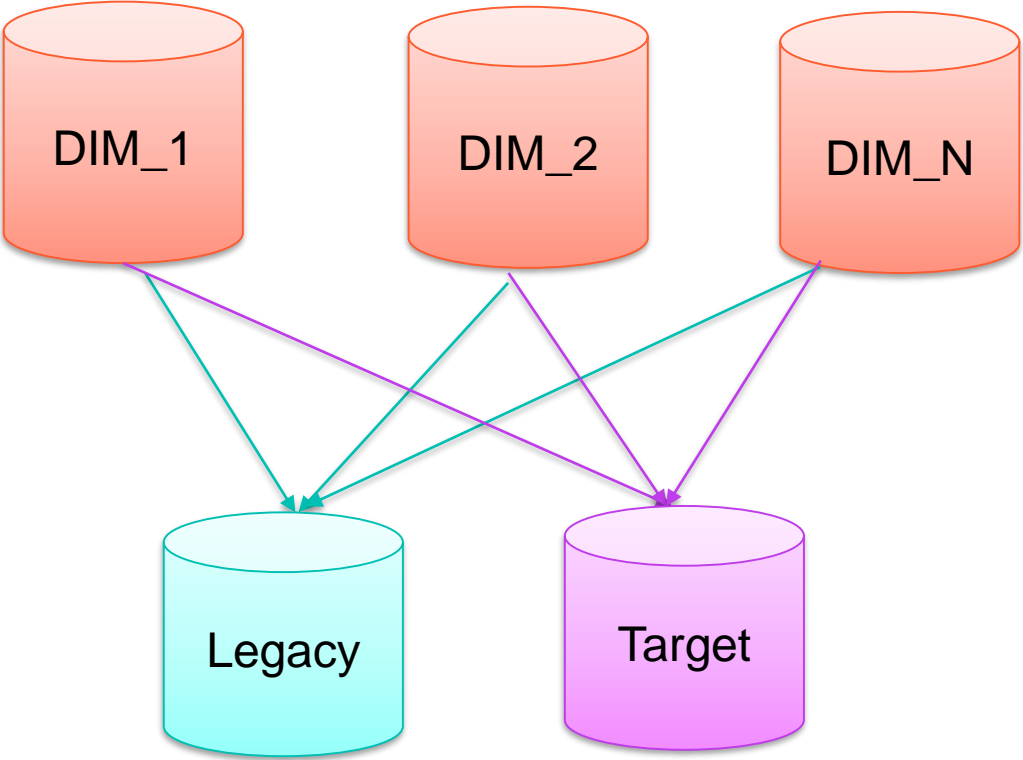

Post Idea implementation cycle

Time taken : 2 hours approximate

Data Modelling Method

Sample POC

POWERBI desktop

POWERBI Service

Power BI Cloud Service

How this model can help migration team

Instant Data Querying

Enables rapid data access and decision-making

Simplified Data Validation

Simplifies multi-dimensional data validation

Accelerated Reiterations

Facilitates faster adjustments and iterations

**Efficient Data Extraction**

Streamlines data extraction processes

**Real-Time Monitoring**

Allows immediate monitoring of changes

**Reusable Customization Setup**

Supports one-time setup for ongoing use

Peers Comments

“Implement the model in IDH directly, The model is helpful.”

- Raja Sree

“This project is good it will certainly reduce testing iteration efforts.”

- Manasa

“This project has been incredibly helpful. It makes it easy to identify differences in validation across various systems and is saving time in fixing issues.”

- Pavan

COSTS

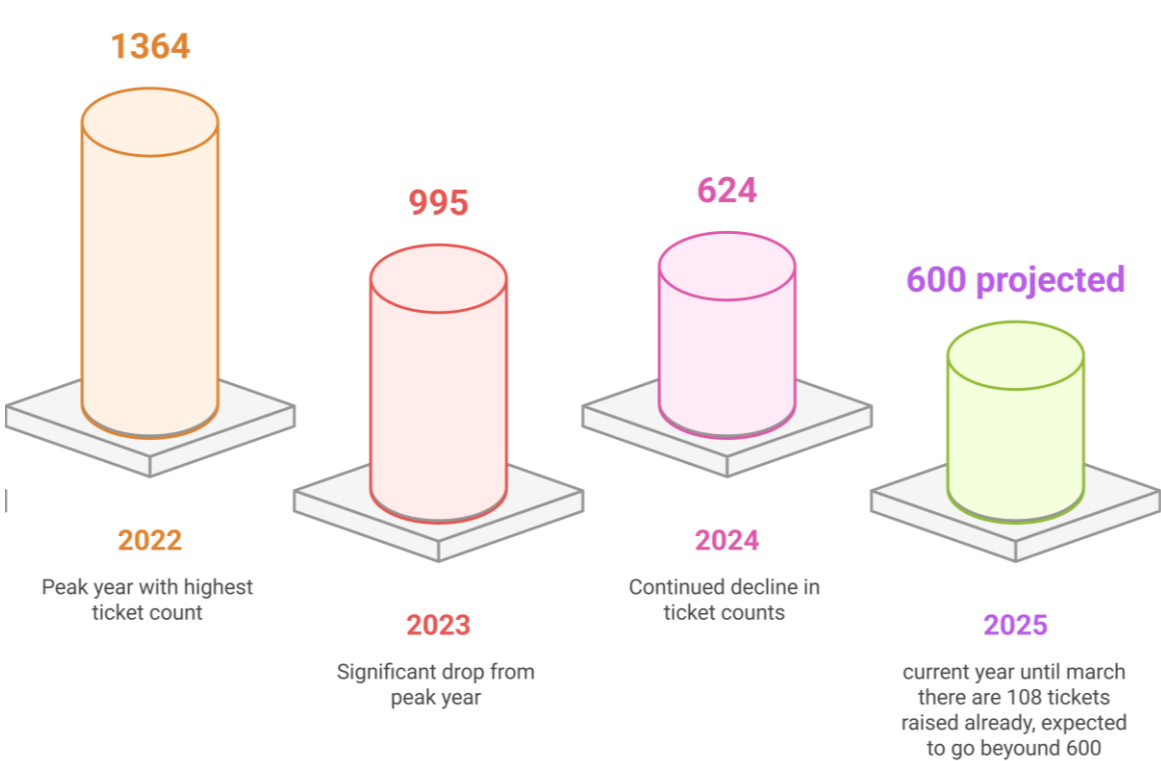

POST IDEA IMPACT

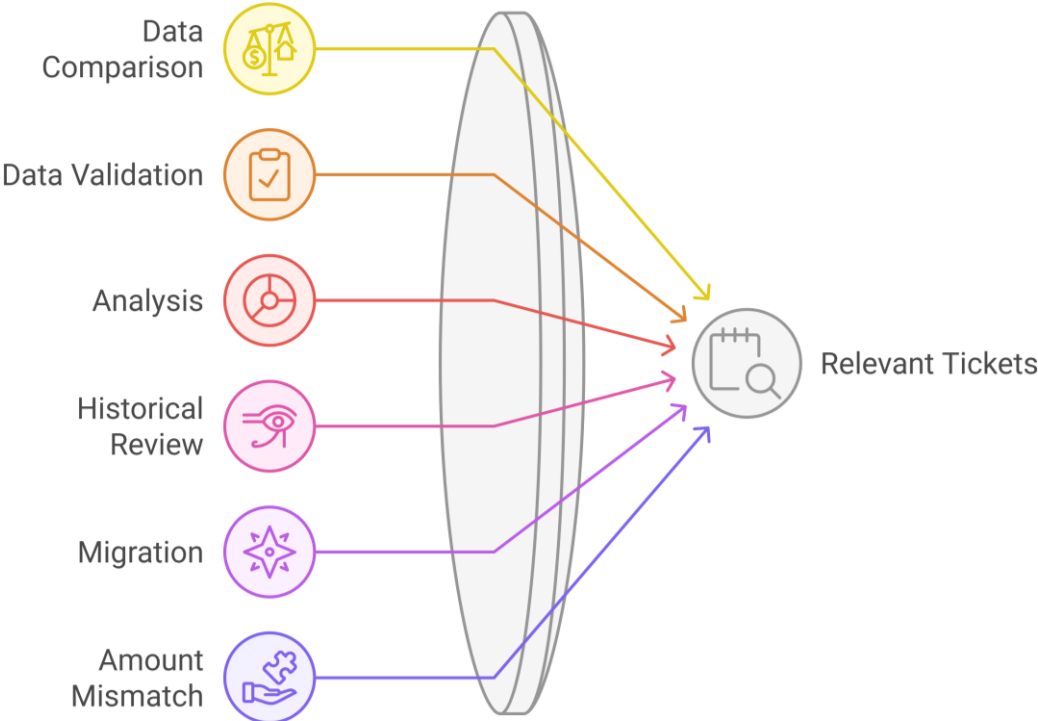

Calculation behind cost saved

TEAM-6

Annual Ticket Counts from 2021 to 2025

Ticket Relevance through Keyword Filtering

Cost savings

Current process cost

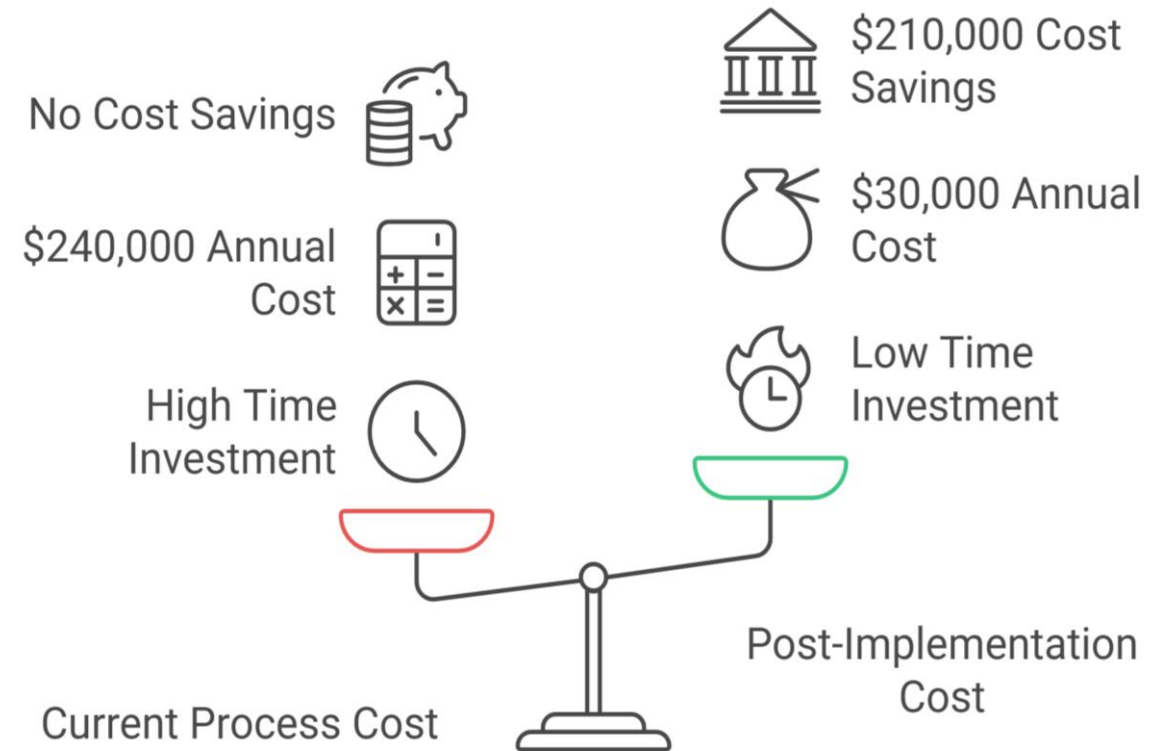

- 1 man hour cost =\$25
- Total time taken per ticket = 16 hours
- Average ticket count per year = 600
- Total cost annually = $25 \times 16 \times 600 =$ **\$240,000**

Post idea implementation process cost

- 1 man hour cost =\$25
- Total time taken per ticket = 2 hours
- Average ticket count per year = 600
- Total cost annually = $25 \times 2 \times 600 =$ **\$30,000**

Total cost savings

=Current Process Cost – Post Idea cost
=**\$240,000 - \$30,000**
= **\$210,000**

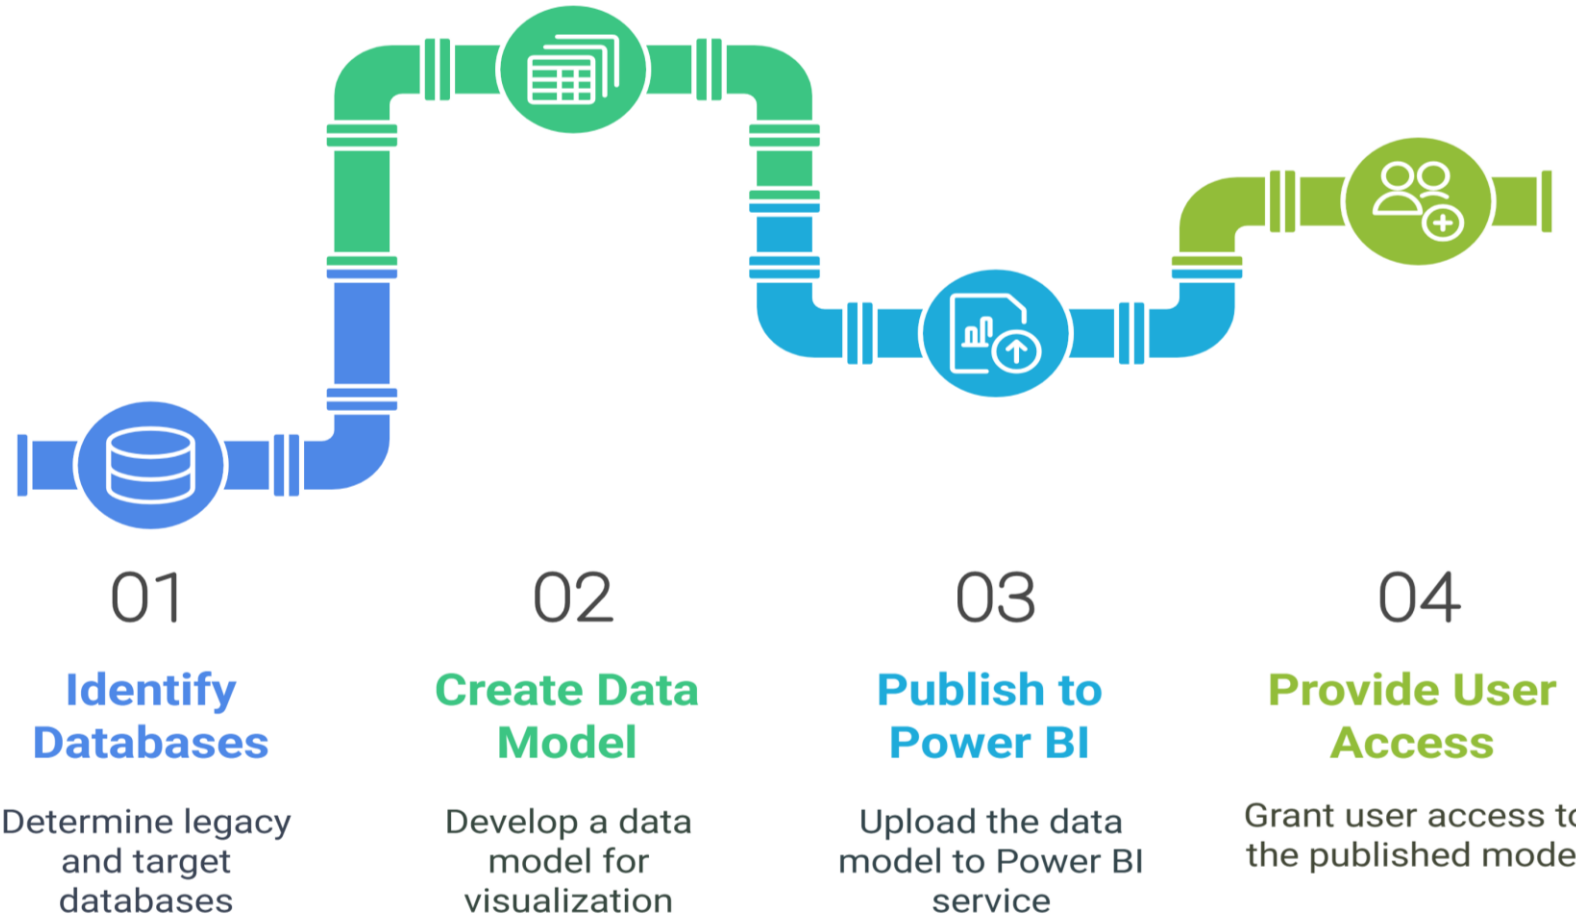

Process Improvement Leads to Significant Cost Savings
